4. Menſe Michael. } { 8. Quind. Martini.

Note alſo, that the Exchequer openeth eight dayes before any Terme begins, (except Trinity Terme) in which it openeth but foure dayes before.

A description of the foure Quarters of the yeere:

And first of Winter.

☉ in ♑. ♐.

WInter Quarter (after the Astronomers account) began the 12 day of December 1638. & continueth till the 11 of March 1639. So that alwaies the first part of the Astronomicall Winter is in one politique yeare, and the latter end thereof in the other: at which time was the shortest day of the yeare, by reason of the Summers greatest declination from the Equinoctiall line.

This season of his owne naturall disposition is knowne to be cold and moist, contrary to the quality of Summer; and in this quarter the inward parts of Man are very hotte, and being healthfull may receive plenty of foode, because heate is now comforted, and is gone inward and there increased, and maketh digestion the better.

How the weather will be therein disposed, is noted for each day throughout the quarter.

The ſickneſſes that accompany this quarter, wherewith many will be grieved, are theſe and ſuch like; namely, paine in the ſtomack, laskes of ſundry ſorts, the cholicke and black paſſion, falling ſickneſſe & ſwoundings, diſeaſes proceeding of rottenneſſe and corrupt humours, coughes, thinne rewnes, head-ach, with other infirmities.

Of the ſecond part of the yeere called the Spring.

☉ in ♈. ☌. ☽.

THe Sunne having fully finiſhed the winter quarter with the laſt part of Piſces, beginning the Spring the 11. day of March, then entring into the firſt minute of Aries the Equinoctiall ſigne and maketh the day and night of equall length, and continueth untill the 12. of June.

This ſeaſon of his naturall qualitie is hot and moyſt temperately, and likewiſe very healthfull, and is therefore accounted the fitteſt time in the yeere to eaſe diſeaſed bodies in, and to reſtore health againe to thoſe in whom formerly it hath beene decayed by any kind of evacuation.

The particular condition thereof may bee ſeene in the diſpoſition of the ſeaſon.

The ſickneſſes of this quarter are melancholy madneſſe, the falling ſickneſſe, bleeding at the noſe, hoarſeneſſe, coughes, itch, ſcabs, many vlcers and ſmall apoſtumes, the gout, & paine in the ioynts, pleuriſies, dropſies, peſtilent agues, ſhortneſſe of breath, faintings, paine in the head, eyes, and ſtomack, rotten fevers, new agues, & other ſtrange diſeaſes.

Of the third part of the yeere called Summer.

☉ in ♋. ♌. ♍.

The third part of the yære Aſtronomicall, called the Summer quarter, alwaies taketh his beginning at the Sunnes entrance into the firſt degræ of Cancer, the 12. of Iune: at which time hee maketh his greateſt declination towards the north from the Equinoctiall, and cauſeth the longeſt day and ſhorteſt night in the yære; and the Summer holdeth on till the 13 of September following.

The predominate qualities of this ſeaſon (according to his proper nature) are heate and dryneſſe, ſpreading them abroad in each part of the day.

As

As for the diſpoſition of the weather, you may ſée in the daily inclination.

The ſickneſſes of this time are divers, as burning agues, pleuriſies, frenſies, hot apoſtumes, divers paines in the head, ſundry inflamations, and new infirmities, proceeding eſpecially of hot cholleriek humors, wherewith many will be ſore vexed.

Of the fourth part of the yeere, called Autumne, or fall of the leafe.

☉ in ♎. ♏. ♐.

The Harveſt quarter (or fall of the leafe) beginneth at the time of the Sunnes departure from the laſt ſcruple of the 30 deg. of Virgo, into the firſt minute of the ſecond Equinoctiall Signe Libra, being the 13 day of December, and doth laſt till the 12 day of December, when the Sunne doth enter into Capricorne.

This Seaſon is naturally inclined to bee colo and dry; yet it is evermore diſpoſed to bee unconſtant and variable, by meanes whereof it is the nurſe of moſt ſickneſſes happening in the Spring

And how the ayre is like to bee inclined throughout all Harvest, may bee seene in the daily disposition of the season.

The diseases and sicknesses most like to molest men in this quarter, are these, and the like, as namely, opelations in the Splæne, costivenesse, shortnesse of breath, fretting in the bowels, falling-sickenesse, and many other melancholy effects, paine in the sides, as stitches and cramps or convulsions, dropsies, staticaes, the strangurie, collick, and many more.

A Briefe description how the Planets are placed above the Earth in the Skie, for every Moneth after Sun-setting, or before his rising; by which you may perceive how they keep their motion day and night all the yeare. Moreover, the New, Full, and Quarters of the Moone, with Astrologicall judgment of the weather for each day of the yeare.

Also, husbandry Instructions for each moneth of the yeere.
